What is Prequel?

Effortless data sharing w/ customers or partners

- Support any destination
- Integrate seamlessly
- Fully whitelabeled

Case Study

- Superwall helps companies create paywalls
- Superwall customers want their paywall event data
 - o e.g., views, conversions, events

```
$UPERWALL ×  ClickHouse × PREQUEL_
```

ClickHouse

ClickHouse features we love

- Speed
 - vs OLTP: 35x faster data ingestion
 - vs OLAP: lower serving "latency"
- Query federation
- Query result streaming

Conclusion

- ClickHouse is a fantastic choice for serving high-volume data products
- Typically requires fewer ETL steps in the serving pipeline
 - Less brittle
 - Enables you to serve fresher data to customers
